

# PUBLIC CLOUD MANAGEMENT

**Simplify and accelerate your migration to the Public Cloud with an expert partner that ensures your investment is cost effective and delivers real business benefits.**

Phoenix's Public Cloud Management service provides a Cloud-agnostic solution that enables organisations to move their applications and workloads to the Public Cloud with confidence and absolute peace of mind.

Our consultants ensure they understand your key business objectives and then, based on real life experience with multiple Public Cloud platforms, propose the most appropriate and cost effective solutions that include the design and migration/implementation through to ongoing management and monitoring.

This approach ensures that the process is simple and risk-free providing predictive cost analysis and tailored, best fit solutions that meet the specific needs of your organisation. Whether you are moving new or existing workloads to the Cloud, you can trust us to provide expert consultancy matched with optimised deployments.

**We understand that entrusting your applications and workloads to a partner is a big step, our consultants and engineers have unrivalled experience in supporting customers on that journey and once there, ensure that they continue to benefit from cost savings and business agility.**
