

# Brexit Statement

In response to the ongoing Brexit negotiations, I can confirm that Phoenix Software is monitoring the situation to prepare for any possible changes that may affect contracts with our customers and supply chain.

Our current view is the impact will be minimal due to the type of goods and services we offer which include electronic software delivery and UK based services and solutions. The subject areas including, but not limited to, of currency, data, commodity supply, human resources and border controls are being reviewed on a regular basis as information is released by the UK Government.

Phoenix Software will issue further communication to our interested parties as legislation is confirmed.
