

VMware Remote Working Optimisation Service

Empower your Remote Workforce

The global situation caused by COVID-19 has reinforced the need for employees to be able to work from home – with a large number of them now needing remote, quick access to their desktops and apps to continue their work and keep our Public Sector organisations operating, despite the pandemic.

With this we have seen a huge increase in the need to rapidly standup virtual desktop infrastructure (VDI) and apps - in record time.

We know that there are many VDI installations across the Public Sector struggling to meet the increased demands made of them and deliver all the efficiencies and benefits of VDI, having not been optimised or customised correctly. Given there is a large investment in VDI technologies, it's sad to see these systems performing poorly and giving VDI a bad name.

But, it doesn't have to be this way ...

Optimise your virtual environment

As a trusted partner of VMware in delivering VDI solutions within the UK Public Sector, we understand that applications are complex, system interoperability is crucial and VDI should translate into real benefits for not only your staff, but those who rely on your services every single day - citizens, patients, students and tenants.

Our VMware Remote Working Optimisation Service delivers the following:

System autopsy, a top down review of the current environment

Remediation GAP analysis report summarising our findings, inhibiting deficiencies, points of remedy, scope and steps to optimise the environment

Technology update

Presentation of the facts and discussion around the Phoenix approach to enhance, improve and upgrade the environment

Start optimising today

Phoenix have a long-standing history and excellent reputation of delivering virtual desktops throughout the Public Sector.

If you'd like us to optimise your existing VDI environment or help you plan what a new one could look like, please get in touch.

hello@phoenixs.co.uk

"Phoenix is a long-standing strategic partner of VMware and has always recognised the great opportunity presented by VMware's vision and product portfolio. Phoenix has made a huge investment in our technology and this is borne out, not only by their Premier Solution Provider status along with their Global and EMEA VMware awards, but also by the innovative projects they have completed for numerous organisations across the UK. Most recently, Phoenix were awarded the NEMEA Digital Transformation Success Story of the Year at EMPOWER 2019 for their outstanding work with one of the UK's leading Universities. "

Alanzo Blackstock
UK&I Director, VMware

True Partnerships. Remarkable Outcomes.

By using IT, we believe that we can enable UK Public Sector organisations to innovate, transform and deliver smart connected services to staff, citizens, patients, tenants and students.

We do this by understanding the individual goals of each and every organisation that we work with to help them modernise their workplace by harnessing the power of cloud, data, AI, security and collaboration tools.
