

Microsoft Security Workshop

Learn how to put next-generation security operations to work for you with the Azure Sentinel add-on module

Workshop highlights

Identify real threats to your cloud environment with Threat Check

Understand your security goals and objectives

Deliver the end-to-end Microsoft security story

Understand the benefits of Azure Sentinel and get a deployment roadmap

Showcase security scenarios with product demos

Develop joint plans and next steps

“The Security Workshop helped us understand our maturity levels on different sectors of cyber security.” -Harri Kivimaa, Head of End User Services, VTT

Do you know how many phishing attacks your organisation has received? If employees are using the right password protocol? Whether personal data is being exposed? In short, is your organisation’s cloud environment as secure as you think it is?

Improve your security posture with a Microsoft Security Workshop

Organisations today are managing a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Get help achieving your broader security objectives—and identify current and real threats—by scheduling a Microsoft Security Workshop.

We can help you develop a strategic plan customised for your organisation and based on the recommendations of Microsoft cyber security experts. You’ll gain visibility into immediate threats across email, identity and data, plus clarity and support on how to upgrade your security posture for the long term.

Why you should attend

Given the volume and complexity of identities, data, applications, devices and infrastructure, it’s essential to learn how secure your organisation is right now, and how to mitigate and protect against threats moving forward. By attending this workshop, you can:

Identify current, ongoing risks to your cloud environment

Walk away with actionable next steps based on your specific needs and objectives

Document your security strategy for the benefit of key stakeholders

Better understand how to accelerate your security journey using the latest tools

What to expect:

During this workshop, we'll partner with you to strengthen your organisation's approach to cyber security. We'll help you better understand how to prioritise and mitigate potential attacks, with:

- Deep analysis from Threat Check of cyber attack threats found targeting your organisation
- Actionable recommendations to help immediately mitigate the identified threats
- A detailed assessment of your IT and security priorities and initiatives, direct from cyber security pros
- An inside look at Microsoft's holistic approach to security, and how it relates to your organisation
- Demonstrations of integrated security, including the latest tools and methods
- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps

Who should attend

The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Data Protection Officer
- Data Governance Officer
- IT Security, IT Compliance and/or IT Operations
- Data Governance

Why Phoenix Software?

When it comes to identity and access management, you need an experienced partner. With nearly 30 years' experience, our expert understanding of software licensing and transformational infrastructure solutions, coupled with the insight and innovation of our delivery consultants, means that we are perfectly placed to advise you on every aspect of your IT strategy.
