

More time, bigger savings, better opportunities

Teachers can save time, schools and councils can see bigger savings and students can have better opportunities to thrive with Microsoft 365 (M365). Forrester has conducted research into the impact using M365 has in Education and here are the results ...

Saving **teachers** time

5 minutes saved per student + **6** hours saved with automatic test scoring
= 216 teaching hours saved per year

With this saving **teachers** can:

Spend more one-on-one time with students

Expand curriculum to meet varying student needs

Pursue continued professional development

Saving **IT** time

With a seamless operating system, updates paused when devices are in use. This new approach eliminates in-class disruptions and increases student learning time.

84% reduction in device setup time

"I encourage everyone to go to Microsoft 365. The ease of management ... makes a huge difference in how we are better able to assist our students in learning."

Director of Technology, Public School

Saving **Schools** money

By using M365 Education you can save more money which can be used to invest in you students and drive better learning outcomes.

Over **£190k**

saved every year with fewer storage and computing power needs

Over **£90k**

saved per year by eliminating web conferencing and learning management solutions

Over **£3.15m**

saved by choosing M365 Education over an on-premise system upgrade

A large **council** could save

Over **£3m** in IT costs

+

Over **£1.8m** in teacher time

Nearly **£5,000,000** that could go toward supporting better learning outcomes

Unlock Limitless Learning
