

BENEFITS OF MICROSOFT AZURE VIRTUAL DESKTOP

WHAT IS AN AZURE VIRTUAL DESKTOP (AVD)?

Azure Virtual Desktop (AVD) is a cloud-based, internet hosted desktop service. Your desktop environment – including wallpaper, icons, toolbars, apps, widgets, and customisations – are remotely stored online meaning you can access your desktop from any device, anywhere.

AVD is the only virtual desktop infrastructure (VDI) that delivers simplified management, multi-session Windows 10, optimisations for Office 365 ProPlus, and support for Remote Desktop Services (RDS) environments.

DEPLOY AND SCALE IN MINUTES

Quickly deploy desktop apps to the cloud, whether modern or legacy, with unified management in the Azure portal. Scale access up and down to suit peak-times, whether you need more during seasonal times or just less at the weekend – be totally flexible!

OPTIMISE COSTS

You only need to pay for your Azure virtual desktops, machines, and Azure storage consumed by users as they use the service. Select and scale deployment options to match your organisation's needs.

SECURITY

With more compliance certifications than any other cloud provider, Microsoft have more than 3,500 security experts dedicated to protecting your data. Azure Virtual Desktop with multi-factor authentication allows users to securely access their work from anywhere.

TRUE FLEXIBLE WORKING

Phoenix empower organisations to understand what collaboration means to them across a range of digital technologies. We provide support with the design, implementation, and management of applications and platforms to improve collaboration and AVD enables this.

SIMPLICITY WITH MANAGED SERVICES

Not an expert in scripting PowerShell, need a helping hand through the process, or would like your system set up for you? Phoenix are specialists in managing Azure Virtual Desktop environments.

SEAMLESS END-USER EXPERIENCES

Given true flexibility, your end-users will thrive. Whether they are loading their desktop on a tablet at home, a shared laptop, or on a 'workstation' anywhere – the experience is seamless and protected.

A TEAM DEDICATED TO HELPING YOU

Our dedicated team of licensing specialists support you to deploy AVD in the most cost-effective way.

MICROSOFT UK PARTNER OF THE YEAR 2021

With us, you know you're in safe hands. As well as an AVD specialisation and our Azure Expert MSP status, we have secured Microsoft's Partner of the Year award in recognition of our cultural, societal, and business success, and on-going contribution and dedication to the UK public sector. The award acknowledges our commitment to customers, the impact of our solutions, and our exemplary use of Microsoft technologies.

TAILORED TO YOU

Utilising technology, we empower public sector organisations to innovate and transform, delivering complete IT solutions and remarkable outcomes. Through understanding the individual goals of organisations, we enable the UK public sector to support digital transformation and harness the power of cloud, data, AI, security, and collaboration tools.

FUTURE-PROOF YOUR ORGANISATION WITH MODERN IT SOLUTIONS

Speak to one of our Microsoft Azure specialists to discover how our Azure Virtual Desktop (AVD) workshop supports you to assess, build, pilot, and deploy AVD within your organisation to drive digital transformation.
