

CLARITY SOFTWARE OPTIMISATION SERVICE

Maximise your Microsoft software investments

As your IT infrastructure grows, centralised procurement, standardisation, and knowledge of software renewal dates can make it challenging to manage your software and accurately predict your annual software spend. This – alongside the pressures your IT department face to demonstrate compliance, while rapidly reducing costs and improving efficiency – requires you to optimise the procurement and management of your software.

What is our Software Optimisation Service?

By bringing together the expertise of our Software Asset Management (SAM), Microsoft, and managed service teams, our Clarity Software Optimisation Service empowers you to address your tactical and strategic software challenges.

Our Clarity Software Optimisation Service allows you to develop a clear vision of your current and future software licencing requirements and maximise the value of your software estate – all while saving money.

Our specialised, objective, and confidential service gives you the insight you need to purchase the right licences, at the right time, for the right price.

“

**With proven savings of between
10% and 30% on your average
annual software spend.”**

THE BENEFITS OF CLARITY SOFTWARE OPTIMISATION SERVICE

We work in partnership with your organisation to:

Understand current licence entitlements and offer a range of licence entitlement services ranging from a full software audit to a licence roadmap

Create a detailed strategy report that analyses both benefits and risks, making recommendations for a solution, which contributes to business case justification

Identify a long-term implementation strategy, including potential growth and decline

Provide specialist advice on how to licence a virtualised environment correctly, on both server and desktop

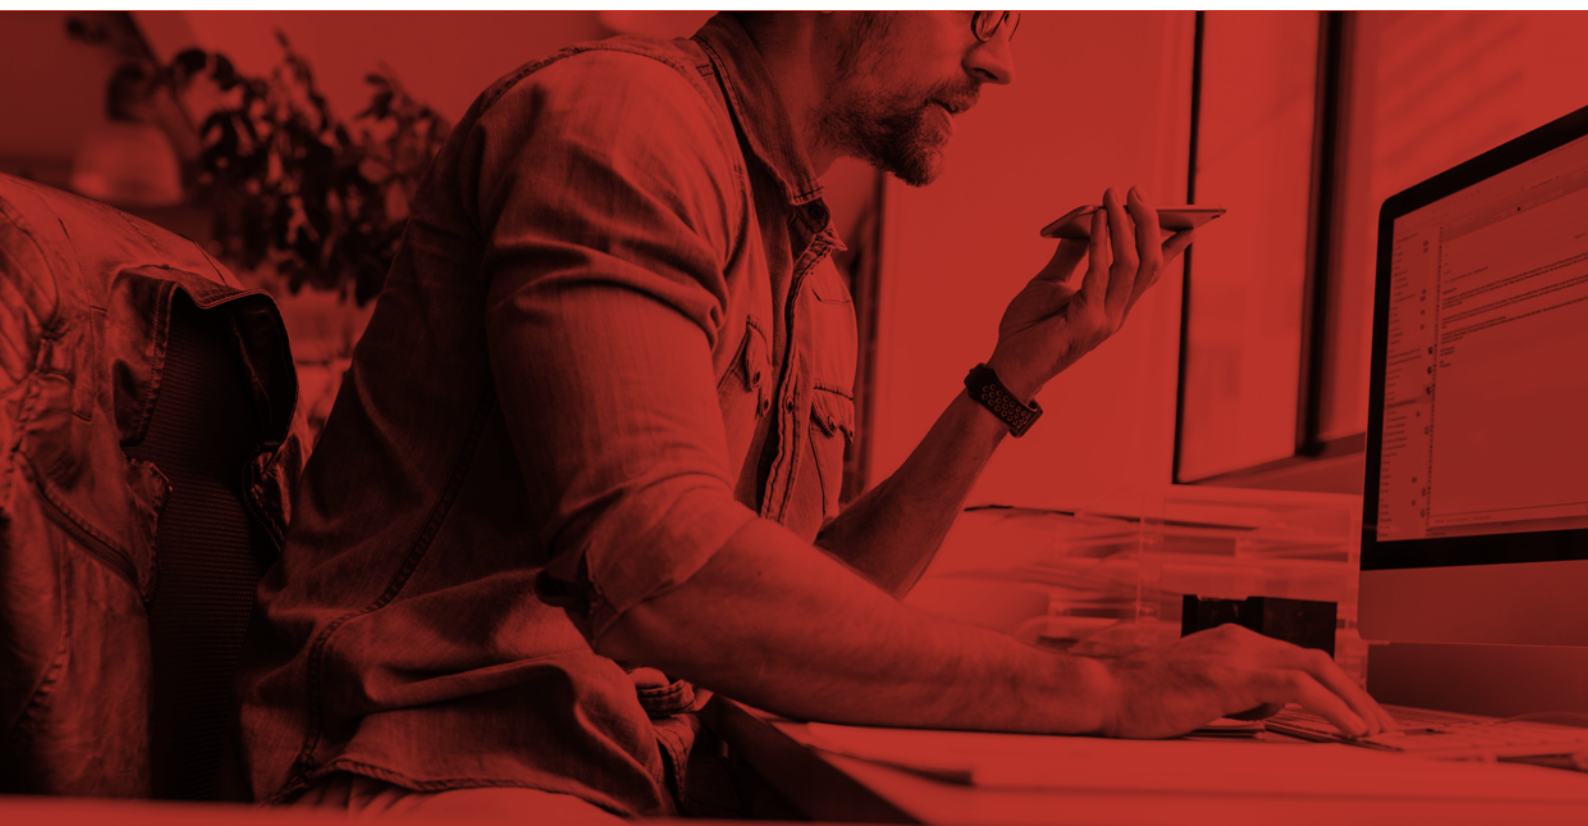

Conduct complex cost modelling, which provides definitive long-term costs for your Microsoft licencing strategy

Make recommendations for, and carry out, vendor negotiations on your behalf

Produce a management presentation pack summarising the analysis and findings that can be used to present within your organisation

ADDRESS YOUR TACTICAL AND STRATEGIC SOFTWARE CHALLENGES TODAY.

With proven savings of between 10% and 30% on your average annual software spend, get in touch with our team to take the first step towards the best possible deal for your organisation. Arrange a call with our specialists below.
