

Phoenix Software Joins Microsoft Intelligent Security Association (MISA)

As a Microsoft partner with 11 specialisations, Microsoft Azure Expert MSP status, a top three FastTrack partner and UK partner of the year 2021 – the MISA membership will see Phoenix Software and Microsoft’s relationship strengthen to further support and empower their customers.

MISA is an ecosystem of independent software vendors and managed security service providers that have integrated their solutions with Microsoft’s security technology to better defend and protect organisations against a world of increasing threats.

MISA helps customers find, try, and buy security solutions that work with their digital environments. As a member of MISA, Phoenix Software can leverage Microsoft Security products to extend solution capabilities and share threat intelligence. They can also get additional access to product teams to speed up integration.

Craig Taylor, Cloud and Solutions Director at Phoenix Software, says: “We’re excited to become part of the Microsoft Intelligent Security Association. This recognition reflects the investment we’re making in Microsoft Security services to support our customers and underscores the importance of our strategic relationship with Microsoft. MISA alongside our Security Specialisations and the Security Solution Partner designation in the Microsoft Cloud Partner program reinforces our position as a Microsoft Security focused partner.”

Phoenix Software’s offer within MISA is their [Sentinel Essentials managed service](#) which uses the power of Microsoft Sentinel to provide customers with a thorough understanding of what security events, issues, and threats are happening in real-time within their on-premise and cloud environments. The service gives customers access to Phoenix’s cyber security specialists 24 hours a day, 7 days a week, 365 days a year and is tailored specifically to the organisation’s requirements to ensure the customer’s systems and data are always protected.

“Microsoft Sentinel brings together data, intelligent analytics, and workflows to unify and accelerate threat detection and response across the enterprise. With Microsoft Sentinel Content hub customers gain access to robust built-in and partner published content and solutions with the click of a button. We are excited to work with partners like Phoenix Software, to develop valuable and innovative content for our users.”- Rob Lefferts, Corporate Vice President, Modern Protection and SOC at Microsoft.

About Phoenix Software

Phoenix enables digital transformation in the workplace, empowering UK organisations to innovate and transform with cloud technology, data, AI, security, and collaboration tools. By understanding the individual goals of its customers, Phoenix delivers remarkable, outcome focused IT solutions and services that allow UK organisations to make a difference to the lives of their employees, service users, and communities.

Phoenix is a signatory on the Race at Work Charter, and a Disability Confident Committed and Living Wage employer. The company is also actively involved in the Women in IT Network, set up to encourage more women into the IT industry.
